Recent Projects

- **Paytoma:** Social web application for splitting shared expenses with friends. Single table inheritance to track transactions of user's friends without them being signed up. Backbone app running on RESTful Rails API. paytoma.com
- **ActiveRecord Lite:** Homebrew clone of Rails' ActiveRecord ORM. Whitelisting, associations and querying. Extensive Ruby metaprogramming. github.com/supernats/active_record_lite
- **Omniloader:** Ruby script for automated, single-step setup of a vanilla terminal to a dev's favored Vim and bash settings. Uninstall reverts the machine back to its initial setup like nothing was changed. github.com/supernats/omniloader
